

Nature Abhors An Hegemon

The Rev. David R. Graham

The One Is Indivisible
The Truth Is The Whole

https://youtu.be/swbCE_klLp0

Nature abhors an hegemon and has powers far more than sufficient to drive the same loco. And always does, always will. This fact is an occasion for faith. For sanity to be maintained, faith in this fact is essential.

The Chinese are not 12-foot men. As Chinese, they are by turns charming, filthy, beguiling, cheats, sorcerers, and racist. Exceedingly racist, exceptionally deceitful. As ChiComs, they are hegemons into the bargain. But they are not, in any description, 12-foot men.

[I am a MacArthur man.](#) I grew up on the Pacific Coast. I am a Western American. I wear a western hat and western boots. I carry a handgun. My sense of my country's spirit and development finds those pointing westward. To me, Asia is America's west and the Asian littoral is America's western defense perimeter. To me, China is The Far West, not The Far East. I see America's teleological force vectors pointed West, not East. My entire life-experience confirms that observation as accurate.

Our distant ancestors, Spaniards and Italians, sought convenient passage westward to China and India, for trade in those nations. They knew that northward passage was frozen and eastward passage freighted by slavers, extortionists, and brigands, aka Moslems.

Our direct ancestors were English Calvinists seeking religious freedom and Scots Calvinists and Catholics seeking, mostly, commerce, but also general freedom. Soon, news of the opportunity for freedom reached and inspired persons at most points on the globe to emigrate to the USA to learn and expand their own and America's freedom.

FREEDOM!

<https://www.youtube.com/watch?v=LEOOZDbMrgE>

The vector of American exploration, the genius of American energy, points westward across the Pacific Ocean. Americans left the East, we left Europe and the Middle East, which are East across the Atlantic Ocean.

That is the Old World. We left it. We came West and Westward is how we think and respond. We framed and raised a New World west of the Old World. A world through which the sounds of freedom ring and reign.

For this reason we purchased Alaska from Russia when offered that Far West land and raised the American Flag even farther West, in Hawaii and The Philippines. We prosecuted and won a war to make the Pacific Ocean a quiet zone with freedom of movement for inter-nation trade and commerce, others' as well as our own.

<https://youtu.be/vjoxlPuEOoA>

Now, a nation in our West and in thrall to the idolatry of Communism, which is inherently inimical to freedom, which is Americanism, announces intention to rule trade and commerce -- indeed, comms altogether -- throughout the Pacific Ocean Area and beyond. That would be China under ChiCom dictatorship. They are self-announced hegemonic hegemons with the facilities of a nation state at their behest. This is serious.

Hegemons are either accepted or defeated, paid off or killed, worshipped or de-ramped. Hegemons accept no other responses to their intention and activity. Hegemons, much like everyone else as well, respect only those who stand to protect and defend their own freedom. Americans stand to protect and defend their freedom and are accorded, accordingly, respect by citizens of other nations.

A man without prestige is not a man. A man who stands to protect and defend his own divine nature and the full panoply of freedom appertaining thereto is a man of respect, a prestigious man. Only the divine has respect, and from that, prestige. Only those who force into actuality, into embodiment in this world, the rights they own inalienably in virtue of their own divine nature, are believed.

[Pacific Pathways](#) is US strategic/tactical doctrine missioned -- actually although not patently -- to de-ramp ChiCom hegemonics.

Unofficially and *sua sponte*, I have thought to think through, on my own, [essentials of Pacific Pathways doctrine](#).

These essentials may be conveyed in three points:

1- Nothing happens unless it is forced to happen. Rely on [mission command](#) rather than on command and control. Authority originates in the depths, rises through the heights, and spreads across the extents . . . propagation and saturation like sound in a cathedral.

2- Compel ChiComs to march simultaneously into multiple battle fronts. Confront them with the fearsome travails of multi-domain operations. Emplace logistics trains to support full-spectrum, multi-domain diplomatic, financial, and war-fighting force -- the latter to comprise battalion strength at least -- on the flank of each of four possible Chinese Communist lines of march: North (into Russia), East (into Taiwan, Philippines, Guam, Hawaii, California, Oregon, Washington, and Latin America), Southeast (into Southeast Asia), and South (into India).

[Contemplating Positions On Chinese Flanks](#)

[China And Iran: A Strategic Hunch](#)

[Leader Bullet Points For Restoring America](#)

3- All war-fighting assets (Branches of Service) subserve the [Army Mission](#). Her Army is a nation's fundamental armed force and sole guarantor of sovereign freedom. An Army's mission is to de-ramp foreign national hegemons by denying them succor derived from landed basing, aka logistics support. Logistics must be landed somewhere. A nation's protective force, Her Army, is as potent as its logistics support is copious and reliable.

Viewing INDOPACOM as a whole, these total/joint -- Diplomacy, Finance, War-Fighting -- force posture necessities should be noted:

1- INDOPACOM is an Army show because the Army is the lead component of the total/joint force -- which includes also State and Treasury Departments-- facing the region's chief hegemon, China.

Every COCOM is an Army-lead show. Army necessities govern the deployment of all three assets of USA Statecraft: Diplomacy, Finance, War-Fighting.

2- One cannot make sense geographically, on a map, of a USA national strategic objective to defeat or even to neutralize Chinese Communist aggressive, hegemonic imperialism unless Army necessities govern dispositions of the INDOPACOM total/joint force.

3- Except for Naval surface/air, submarine attack, and Marine assault, the INDOPACOM joint force components are land-based (Army) forward artillery of various ranges – cyber and space being the longest-ranged – supporting Army strategic and tactical necessities.

4- Naval surface/air, submarine attack, Marine assault, and Air Force are for clearance of Army Pacific Pathways and Asian Mainland Pathways if, as likely and reasonable, it comes to that. Army should be carrying Navy, not Navy Army, in INDOPACOM.

5- The problem set in INDOPACOM is land-based, not water-or air-based, and especially so when facing Chinese aggressive, hegemonic imperialism, which is the palpable, salient fact in that COCOM. Naval/Marine, Air, Cyber, and Space operations are Army operations extended and coordinated -- along with diplomacy and finance -- in the multi-domain battle space.

And there is this foundational guidance:

Five Axioms Of Pacific Pathways

Axiom One

To de-ramp ChiCom hegemonics, USA must ally with Russia and India to that effect.

Axiom Two

To de-ramp Arab/Pan-African hegemonics, USA must ally with Russia and India to that effect.

Axiom Three

To de-ramp Euro-American Socialist hegemonics, USA must ally with Russia and India to that effect.

Axiom Four

[USA, Russia, and India](#) should invite Japan and Egypt into their circle of decision and force.

Axiom Five

Hegemons do not de-ramp unless forced to it.

[2016 LANPAC Interview with GEN Robert B. Brown](#)

Enfin, cinq observations dans la journée:

Extraordinary, is it not, that in the space of a few short years, say, two at most, [The US intelligence-Foreign Policy Establishment](#) has gone from *China is a global competitor* to *we are at war with China*?

Peoples are reclaiming their identities as nations comprising sovereign freedom. The Sons and Daughters of God are de-globalizing.

Americans are born to self-govern. Imposed governance, global governance, is hateful to Americans. Freedom means self-governance. Freedom is self-governance.

Not by values, not by psychology, not by laws, not by politics, not by education, not by war, not even by religion do we, but by faith in God, which is faith in our own divine nature.

We have a [criminal conspiracy](#) masquerading as our [national security apparatus](#). Only the humble are strong. They rely on intelligence, not Intelligence.
