

# White Paper For The Incoming Administration

[The Rev. David R. Graham](#)

[Adwaita Hermitage](#)

01 November 2020

Institutions established to regulate inter-nation relations after the conclusion of WWII have run the course of their viability and usefulness. They went obsolete on [25 Demember 1991](#). Since then, issue of very rich families who established those regulatory institutions – and who hired their issue to execute the missions thereof – are angry that the inter-nation order established by their fathers and mothers reached the end of its course in life. They grew accustomed to living hot and high off the *Cold War*. Indiscretions were forgiven the issue because their parents *had bigger fish to fry*, so they thought.

Those issue fight loud, hard, and irrationally today for beneficences bequeathed them by their parents. Very rich they are. Issue of other parents altogether also fight loud, hard, and irrationally now for admission to the sanctuary of those same beneficences. It is all for naught. Everything in this world and of it has a span of years which, when finished, the thing, animate or inanimate, disappears and reverts to universal ~~slurry~~ dust substance.

Some new families, and some old, are experimenting with conceptual and institutional structures for regulating inter-nation relations, aka communications. They face and would fashion, for current benefit, current conditions rather than those extant between 1944 and 1991.

Best now it is to let legacy very rich families tend their irate fires, which will burn out soon enough – e.g., [The Great Reset Initiative](#) and [Transition Integrity Project](#). Instead, put time, money, and energy into building out fresh, agile institutional arrangements which satisfy the perpetual desire of most nations to trade in fair, orderly, and reliable *corridors* with other nations.

Families who succeed today in intra-nation as well as inter-nation relations build out – *eco-nomos* in the true sense of the word – regulating institutions through which they compel and maintain fair, orderly, and reliable communications among all nations.

None of the institutions built out from the success of WWII, and still hanging around today, can do that. All are scrap. They face departed facts, non-existent problem sets. They did their job and finished it. Normal persons move on to the next job, at the next job site. Nations are many, humanity is one race.

The job normal people face today is as always: which nations do not desire fair, orderly, and reliable communications and rather would dominate the communications of as many nations as they can, and preferably all of them? Who are the global hegemons? In 1944-45, Germany, Japan, and The Soviet Union answered that description. Today, the People's Republic of China (PRC), Turkey, and Iran answer it.

Today, the geographies, the strategic interests, the economics, the personalities who nurse on hegemonic impulses, the end-states contemplated by those personalities, the diplomatics, the financials, the war-making tastes, proficiencies, and capacities . . . all are unique to current conditions.

Today, successful American families, rich one way and another, intend to impede, obstruct, and force the demise of hegemons they recognize. With respect to inter-nation relations, that would be the PRC, Turkey, and Iran. To eradicate the hegemonic ambitions of any one or all of those aggressors is a noble, heroic, and marvelous accomplishment to undertake.

There follow conceptual and institutional build-outs – strategic and tactical, foreign and domestic – American families can accomplish to fulfill their intention to allow no hegemons in inter-nation or their intra-nation operating spaces.

The perpetual objective of inter-nation relations is to keep the streets, so to speak, open for traffic that does not harm or obstruct the streets. How they use the assets (goods and services) coursing through their streets (comms) is the townspeople's (the nations') business. That the nations have available to them safe and efficient streets (comms), by means of which to trade their assets (goods and services), is the job of the nations' governments. The name of the job is [statecraft](#).

Government is a negative activity, feminine in nature. Government removes obstructions frustrating a nation's citizens. A nation's citizens build. Theirs is a positive activity, masculine in nature.

The more prosperous a nation, the more negative, feminine, becomes their role in inter-nation communications. To wit, the more you have, the more you are responsible for keeping others' comms open and reliable as means for them to obtain nourishment for themselves and fulfillment for their wishes.

Families who succeed in [building out](#) useful, reliable comms for the nations may be found to have digested, somehow, the learning of two illustrious observers of land and water relative to the intercourse of nations:

[Halford John Mackinder: \*The Geographical Pivot of History, and Democratic Ideals And Reality\*](#)

[A. T. Mahan: \*The Influence Of Sea Power Upon History 1660-1783\*](#)

Successful families also will have been found to have learned, somehow, the art of statecraft taught by these masters through example:

[Douglas MacArthur: \*Reminiscences\*](#)

[Charles A. Willoughby: \*MacArthur: 1941-1951\*](#)

[Douglas Southall Freeman: \*R. E. Lee\*](#)

[Christopher Bassford:](#)

[Niccolò Machiavelli: \*The Prince\*](#)

[Von Clausewitz And Trinitarian Warfare](#)

# 1- Strategic Alliance And Intelligence System

## Three Brothers Plus Two / Three Eyes Plus Two

India, USA, and Russia together triangulate the PRC, Turkey, and Iran with all three assets of statecraft: diplomacy, finance, war-fighting. These three are brother nations in numerous and decisive vectors of potency. Their power is unmatched in spiritual, cultural, and physical presence. Their authority inside inter-nation relations, therefore, is supreme.

These three brother nations comprise the system of *global governance* responsible now, and considerably into the future, for making and maintaining fair, orderly, and reliable communications inside the nations' operating spaces. Japan and Egypt join the three in this capacity and duty to protect inter-nation communications. Institutional arrangements for making and conducting the peace, to resolve upon and execute therefrom, are in the hands of these five brother nations by virtue of their superior powers and geo-cultural positioning.

Parallel with this system of inter-nation order is the reconstitution of Five Eyes as India, USA, Russia, Japan, and Egypt. Let *this* Five Eyes observe developments and report aggressor nations to Five Brothers for compulsion to unconditional surrender, following which, trust but verify.

The perpetual objective in regulation of inter-nation communications is the prevention of rampancy by a hegemon. Hegemons spend time, money, and energy obstructing and closing communications. This makes them unmistakable. Civilized persons spend time, money, and energy opening and maintaining communications. This makes them unmistakable.

The strategic objectives of civilized nations now and forwardly are:

- (1) prevent PRC from controlling [The Heartland](#) and,
- (2) lay in security for global comms subsequent to PRC's ramp-down.

These objectives are achieved when civilized nations maintain fair, orderly, and reliable comms through gateways to lands and waters in and around [The Heartland](#).

Flood PRC's perimeters with health, which is to say, unobstructed movement of the nations' goods and services through defiles in arteries of trade. PRC will be thrown back on her inherent inadequacy for rising to, much less maintaining, the sole global hegemon status she envisions for herself. Keep the global comms fair, orderly, and reliable. Health and quiet must attend the result.

## 2- COCOMs, Treaties, And Inter-Nation Council

### COCOMs

#### Independent Nation Treaty Organizations A Grand Council Of Independent Nations

Let the **US COCOMs** look something like this:

ACOM (Arctic Ocean plus seas at and above @ 57 degrees north latitude)  
ATLANCOM (Atlantic Oceans)  
CARIBCOM (Caribbean Sea)  
MEDCOM (Mediterranean Sea)  
TRECOM (Adriatic, Black, Baltic Seas)  
PACOM (Pacific and Southern Oceans plus Arafura, Coral, and Tasman Seas)  
CASCOM (Coastal Asian Seas: Okhotsk, Japan, East China, Philippine, South China)  
IACOM (Indian Ocean, Arabian Sea)

Let **Independent Nation Treaty Organizations**, comprising independent nations bordering seas and oceans, look something like this:

Arctic Ocean Independent Nation Treaty Organization  
Atlantic Oceans Independent Nation Treaty Organization  
Caribbean Sea Independent Nation Treaty Organization  
Mediterranean Sea Independent Nation Treaty Organization  
Three Seas Independent Nation Treaty Organization  
Pacific Oceans Independent Nation Treaty Organization  
Coastal Asian Seas Independent Nation Treaty Organization  
Indian Ocean and Arabian Sea Independent Nation Treaty Organization

Let **A Grand Council of Independent Nations** replace the United Nations:

Comprising independent, sovereign nations only. No legislating, funding, agitating, intervening, or judging. No institutions even remotely comparable to the UN Security Council, and no nation able to veto matters participants desire brought to the Grand Council for light and airing.

### **3- Clean Out The US National Service Academies**

#### **Start At West Point, The Cynosure Of The US Armed Forces**

Accomplish the following:

- 1- designate the Supe a three-year rising 2-Star billet, the Com a two-year rising COL or 1-Star billet, and the Dean a four-year rising COL or 1-Star billet;
- 2- enforce the traditional Honor System, separate those found on an honors violation;
- 3- push down SAMS-type MA/MS curricula to at least Third Class year, especially geo-strategics and political philosophy;
- 4- rebalance the curriculum to favor engineering, geography, and geo-strategics (Three Gs), removing altogether therefrom [Critical Race Theory](#) and its overtones.

Designating the Supe a terminal 3-Star billet and the Dean a terminal 1-Star billet says the Army does not care about West Point.

Not enforcing the traditional Honor System while also promulgating [Critical Race Theory](#) says West Point does not care about the Army.

Their mutual carelessness invites taxpayers, through Congress and an Administration, to defund West Point and punish The Army. Even the Judiciary could decide that estrangement between West Point and The Army argues against the prestige of both and for both causing harm to Cadets and Soldiers.

West Point is not inevitable. The Army is not invincible. Mutual carelessness between The Army and West Point – evidenced in the command structure imposed on West Point and West Point's own decisions against moral and curricular rigor – are not invisible. These factors generate consequences.

## 4- Clean Out The US Federal Bureaucracy

### Erase At Least Half Of Civilian Billets In All Three Branches

Especially worthy of the red line are billets whose occupiers self-promote, self-direct, and self-monitor in the name of *national security*. There is no national security and none is possible, ever. The phrase is a lie. Anyone using the phrase is a lying self-promoter and seditious towards the US Constitution.

There is always national opportunity.  
There is never national security.

Also worthy of the red line are billets tasked with heaping up regulations on American citizens, collecting or analyzing intel feeds, and making up policies and procedures. [This shows intent](#) for an excellent start. Also [here](#),

The Agency's plots at Langley and elsewhere were well-met as newly dedicated forest and field, all of their billets permanently and irrevocably red-lined, and caravans of busloads of their minions, past and present, brought to prosecution for subversion of Americans' prestige, freedoms, and sovereign nationhood. The Agency is wormwood from inception.

Washington D.C. themselves recognized the bitter taste of the CIA when they eliminated, effectively, the first word of their name by creating the ODNI as central processor of information gathered by the nation's eyes and ears.

All of the hurt and trauma heaped on Americans during the last seven plus decades originate at Langley, Yale, Princeton, and Harvard.

If a successor to the Agency is wanted, name it the National Opportunity Agency and task it accordingly: to recognize and cultivate opportunities to expand the sovereign freedom of Americans.

## 5- The 14th Amendment And RICO

### Legacy Families Deserve Prosecution For Sedition In Secret And In Public

Let it not be said that the very angry, very rich issue of very rich families who built out institutions to regulate inter-nation relations from the conclusion of WWII do not prize their very rich privileges. Rather than lose those privileges, those issue – and their ancestors who remain among the living – are throwing [a world-wide destruction party](#) to warn off the timorous from their turf. It is a weak play, but play it they do. See also the [Transition Integrity Project](#).

In answer to which is: the [Equal Protection Clause](#) of the [14th Amendment](#) to the US Constitution. The very angry, very rich issue, and their very rich ancestors, responding to very angry thought leaders, hell raisers, and peers like Bill Ayers *et al.*, picked [race](#) – rather than traditional Marxism's [class](#) – to drive chaos into citizens of America and other nations. They intend their [activism](#) – following classic Marxism-Leninism – to pretext their own accession to untrammelled power over the US.

Even had Bill and his very angry, very rich, legacy family peers followed classic Communist doctrine, fronting [class](#) as the chaos-inducer, he and they would have self-exposed to prosecution for sedition under the [Equal Protection Clause](#). As it turns out, they did anyway. They self-exposed to prosecution for seditious [racism](#). [Critical Race Theory](#) – a race-based hegemonic ideology sexed and smoked up by French Afro-Carib Communists – is their pretext for attacking the US Constitution, with a view to seizing Americans' assets. Allies and sympathizers among US government officials, who could have prosecuted them for sedition, kept the issue of very angry, very rich, legacy families – and their ancestors – from answering for their behavior at the bench or bullet.

Secret and public financial, intelligence, and kinetic networks and NGOs operated by very angry, very rich legacy families are overdue for rout and ruin by way of RICO prosecutions for sedition under the [Equal Protection Clause](#) of the [14th Amendment](#).
