It is noteworthy that, historically, Arab and Mohammedan belligerence relies on proxies and, to support that, slavery in its numerous forms. The pattern continues today. Indoctrination, especially to a *soi disant* religious structure, is one form of slavery. "Dhimmitude" and induced poverty are others, as is employment as hostage holding.

The "terrorism" beast is a hydra, having multiple heads, all of them sovereign nation states. Chasing state-supported mercenaries, state-owned operator teams and self-starters neither threatens nor harms the beast. The beast will succumb when its heads, its dictators, are severed all at once and at the same time a lethal blow strikes its belly, its control of petroleum. Not petroleum but its controllers are the source of fracture in the modern world. Improve the stewardship of petrochemicals, improve the world.

Disparagement of religion is support of Mohammedan tyranny.
