Clear View Of The Picture Puzzle

New Town, Edinburgh, Scotland

View of New Town from Edinburgh Castle. Designed by Robert Adam, New Town is a UNESCO World Heritage Site. David Hume and other luminaries of the Scottish Enlightenment and later years called New Town home.

On ACORN-Cloward/Priven-Alinsky-Liberation Theology-Black Panther-Rainbow Coalition-Muslim Brotherhood tactics and strategy, which are the nature, destiny and MO of the White House's current occupants and staff:

All the picture puzzle's pieces of which I am aware lock into position effortlessly and of their own accord on the supposition that the cat in the White House is a Muslim Brotherhood mole and sharia stalking horse since the early 1980s, pushing system take-down preliminary to sharia take-over. The cat in the White House is the spear tip of Muslim Brotherhood supremacy in North America.

Far more than "Chicago politics" thuggishness and skulduggery is emanating from the White House. Muslim Brotherhood thuggishness and skulduggery is the real name of the extrusion debasing that national treasure and repository of our nation's honor and vitality. This is a far more extensive, dangerous and puissant enemy than Chicago politics. Chicago is, after all, America and American. The Muslim Brotherhood is neither.

This observation relies on a subsidiary one, to wit: progressive collectivists, "lefties," "liberals," a/k/a Communists, are acting the part of useful idiots for the Muslim Brotherhood, which then can rely primarily on the likes of Griffin, SEIU, KO, their myrmidons, vestigial media, etc. to do the Cloward/Priven-Alinsky-Liberation Theology-Black Panther-Rainbow Coalition-Muslim Brotherhood strut and take the heat while performing the proximately useful tasks -- to the Muslim Brotherhood -- of arresting, disrupting and commandeering the nation's life process.

This observation and its subsidiary imply that there have been two overlapping and, since the 1940s at least, mutually reinforcing revolutions in the USA during the last hundred years:

first the progressive collectivist revolution, from Ivy League faculties and administrators, to include Woodrow Wilson, culminating about 1990, and;

second the Muslim Brotherhood revolution, from Egyptian and West and North African academic faculties and administrators, to include Blyden, Qutb and Fanon (originally Caribbean), culminating about 2008.

Are **Dan Riehl's** and his supporting actors' scrutiny of the Alaska situation and personality(ies) consequential? Ooooooh yes they are! Two obvious indicators:

1- As Ran says, "... you know you're over a target when you start to take flak." (Observe the remarkable volume and intensity of it here!)

2- Whenever and wherever all is not as it seems, the seeming is all over the lot; it is never merely local, as **Dan Riehl** illustrates and several commenters point out.

It seems to me that overall, nationally, the un-American element is being fixed at its center, is ready to be hit in its flanks and is now being probed for weak points all along its front and brilliantly but not enough on its flanks.

The essential weakness of the un-American element, IMO, is its failure to appreciate the ambiguity of existence, especially its own activities. It cannot react moderately to dissonance. Its active and reactive behavior is massive, impulsive and unadaptive and it cannot deal in time-lines not of its own making. All of these qualities reflect the failure to appreciate and thereby learn to cope with the ambiguity of existence. The un-American element cannot deal with ambiguity, it is self-possessed and self-promoting rather than self-confident and self-aware.

It seems to me that probing among the hinges of that weakness, as is being done, and can be done more numerously, leads to the rear areas of this un-American element, **from which it can be squeezed off its supply lines.**

Nothing in the entire universe is more ugly or more evil than the White House's current occupants. The term of Classical Christian Theology for such a phenomenon is *Anti-Christ*.

With *buona fortuna*, the trail of investigative reporting will lead, ultimately, to this Muslim Brotherhood mole who made a personally impecunious, now veiled trip to Pakistan in the early 1980s on inconclusively identified travel documents, and returned with a name change, or perhaps, a name reacquisition, to emphasize loyalty, which was demonstrated yet again and convincingly in the choice of venue for address "to the Muslim World."

Not a "Manchurian" mole but a willing and eager one, as demonstrated by a pattern of years of association with Muslim Brotherhood/Afro-Centrist activists. Afro-Centrism is Muslim-based: cf., Blyden, etc.

And in which financial, academic and labor institutions in what is still officially the United States of America is the Muslim Brotherhood (through its countless fronts) a significant or decisive presence? And how do these correlate with the mole's beneficiaries?

And are these battering rams called "legislation" that are pounding down or impending to pound down the nation-state still officially called the United States of America precursors of sharia?

If this individual is a Muslim Brotherhood mole -- not Wahabbist, not AQ, not IRGC, though linked to the latter through Hamas and Hizbollah, the one an MB arm, the other an MB beneficiary -- then all the pieces of the puzzle of which I am aware settle into place and the picture is complete, simple and actionable.

The name for it is Afro-Mohammedan Imperialism.

Until recently it went by stealth in this country (The United States of America), but the last 12 months have seen it manifest severally and with increasing vigor and visibility.

The ultimate outcome of unattenuated drilling, through layers of deceit, into what is happening is going to reach that mole and this picture: the Muslim Brotherhood wrapping claws around The United States of America through an MB mole, the cat who is the White House's current occupant.
