

Colonize Afghanistan

The word *Kandahar* means Alexander. The principal city of southern Afghanistan represents the Macedonian Marvel.

In the hands of families and tribes controlling poppies and logistics uneasily lie the power and wealth of Afghanistan. The mountain passes, especially the Khyber, and the Circle Road around the Central Hindu Kush Mountains are the Afghan logistics.

The world cannot afford drugs and barbarian hordes in her midst. Soft (Progressive) and Hard (Mohammedan) Terrorism are conjured and funded by drugs. They issue from barbarian conditions: droogies.

The only solution to the problem that is Afghanistan is colonization for a very long time. Leaderships of Great Britain and India realized this centuries ago but effected it half-heartedly. India is re-entertaining the idea, and properly so.

Alexander had the right idea, bequeathing his name there to this day. It is still the right idea and demands implementation: colonize and control the place to make it modern and mature.

Ethnic Divisions
